TOP 500

Parts and Accessories for
MGF and MGTF 1995 to 2005
MG production at the BL Abingdon plant stopped in 1980. The badge appeared on various hatchbacks and saloons until 1991. In 1992 the newly formed Rover Group used the badge more appropriately on a limited edition of the classic MGB - the RV8. The success of this model prompted the development of the MGF which was launched by the company (now owned by BMW) at the 1995 Geneva Motor Show. The MGF came in two models based on the K series power unit in mid-engine configuration and with Hydragas suspension. The basic model was the 1.8i 188 bhp. The VVC (Variable Valve Control) version produced 143 bhp. The specification included remote locking, immobiliser; alarm, electric windows and heated mirrors. The VVC version had ABS, leather trim and power steering (later available on the 1.8i). Keeping to MG tradition for new models, the first MGF had VIN 251 (251 was the old MG Abingdon telephone number).

Special Editions of both versions were produced. In 1998 the Abingdon LE had leather upholstery, interior and exterior chrome fittings, stainless steel grills and the distinctive 'Brooklands' dark green paint finish. The 16" Abingdon style wheels were also standard on this model. In 1999 the 75 LE commemorated the MG 75th anniversary - available in Mulberry Red or Black and otherwise similar to the Abingdon.

In 1999 the MGF Mk2 (starting VIN XD504633) was launched with a re-specified electric power steering, double skinned fuel tank and changes to the cylinder head location and gasket. Along with cosmetic changes, there were new seats and an up-rated stereo system. ABS was standard on the VVC version. In 2000 the MGF Steptronic had continuously variable automatic transmission with gear lever and steering wheel paddle control. The gearbox input speed limit made this feature applicable to the standard 1.8i engine only.

More special editions followed. The Wedgewood SE came out in July 2000 with CD player, leather seats, more chrome, 16" Multispoke wheels and a rear spoiler. Not surprisingly the only colour was Wedgewood Blue. The Trophy 160 with colour options Blue or Yellow came out in May 2001. A returned VVC engine produced 158bhp. The suspension was lower and stiffer and red 4-pot callipers operated on larger front discs. A front splitter and rear spoiler improved the aerodynamics. Not strictly a special edition, a cheap fun alternative to the Trophy was the MGF 1.6i with various specification reductions and a less powerful engine. The last special edition of the MGF was the Freestyle introduced in Autumn 2001. Essentially the Trophy without the engine tuning upgrades, this model was therefore available in 1.8i and VVC versions. The last of the 77,301 MGF cars built had VIN 2D535576.

The MGF was launched in 2002 starting with VIN XD504633. There was a distinctive style change and important improvements to the steering, body shell stiffness and suspension with conventional coil springs replacing the Hydragas of the MGF. There was a range of engine variants starting with the TF135 based on the 1.6i engine and the TF120, 135, 160 all based on the 1.8i unit. The interior trim specification was much as the Mk2. The MGF was the first Roadster to receive 4 stars from the Euro NCAP crash test. In 2002 it was voted 'Cabrio of the Year' by the COTY-Jury.

Various special editions with a range of paint, trim and accessory variations were produced. The Sprint SE in July 2002 using TF135, 160 variants, the Cool Blue SE in March 2003 using TF135, 135 variants, the SunStorm LE in October 2003 with TF115, 135, 160 options. The 80th Anniversary LE was launched in January 2004 with all engine options. The Spark SE was produced in July 2004 with 115, 135 and 160 variants. The Vintage Racing SE (TF160) appeared at the 2004 Paris Motor Show for the French market only.

The MY2005 TF was the last model upgrade before the demise of Rover Group in April 2005. There were no dramatic changes but a series of genuine upgrades and enhancements to the suspension, trim and accessories including a new hood with a heated rear window. The last of the 39,249 MGF cars built had VIN 5D641764.
Online price list
This catalogue is also available on the internet, with a convenient online order function. Due to the very large number of parts described in this catalogue it was not possible to include a printed pricelist. Our prices can be viewed online and are updated frequently. Please use the internet for further information and for reference. We are happy to assist you, if you have questions: Just call, fax or send an email.

**DIPSTICK**

*all MGF and MGTF*

Part no. 469684

---

**FILTERMAG**

For oil filters from 2.90" to 3.40" diameter, height 2.0"

Part no. 481133

FilterMAG’s powerful rare-earth magnets trap and hold wear-inducing metal particles smaller than 40 microns down to 1 micron that the filter cannot stop. It extends oil life and reduces maintenance costs. Easy fitting while magnetic force „snaps“ FilterMAG to the filter canister. FilterMAG has a lifetime warranty.

For oil sump plug

Part no. 468118

---

**ELRING SEALING COMPOUND**

Dirko grey sealing compounds, permanently elastic, cold vulcanizing - perfect for the oil sump silicone-rubber based. Dirko 036.161: neutral curing, temperature stability -50°C to +180°C. Dirko HT 705.705: acetate curing, temperature stability -50°C to +250°C, brief periods up to 300°C.

Typical applications: Cars: Connecting joints, cylinder head, crankcase, oil sump, timing case, thermostat, water pump, transmission, axles, differential. Radiator, chassis (cannot be overpainted).

Motorcycles: Crankcase, cylinder block. Other applications: Engines, machines and assemblies, for hobbies and do-it-yourselfers. Processing: Clean the surfaces that are to be sealed and remove all traces of grease. Apply Dirko and assemble the components („wet on wet“). When sealing externally without disassembling any parts, wait at least 30 minutes before restarting. Curing time: approx 2mm/day. Caution: Keep out of the reach of children! 70 ml tube

Timing belt

**MGF 1.8 (except VVC) to September 1998**

(to engine no. 18KaFj31-153992 and 18KaFj32-147262)
identify by 143 teeth and 23 mm width
Part no. 339319

**MGF 1.8 (except VVC) from September 1998**

(from engine no. 18KaFj31-153993 and 18KaFj32-147263), MGF 1.6, MGTf 115, MGTf 120 and MGTf 135
identify by 145 teeth and 26 mm width
Part no. 360225

**MGF 1.8 VVC and MGTf 160**

front - identify by 143 teeth and 26 mm width
Part no. 360224

rear - identify by 68 teeth and 23 mm width
Part no. 339320

Penrite Engine oil SAE 10W/50 - full synthetic

**Specification:** API SL/CF, ACEA A3/B3

**Enviro+ 10W/50** - a mid-SAPS oil for most European, Japanese, US and Korean petrol and diesel engines specifying API SM or ACEA C2/C3 oils. Also for vehicles that are using excessive oil. Viscosity grade may not suit all vehicles and it is not recommended where A1/B1 and A5/B5 are specified. Neither product is recommended for use in motorcycles.

**Benefits:**
- Extends exhaust catalyst life in petrol vehicles
- Long drain intervals
- Maximises DPF life and engine performance
- Emissions system friendly

**Industry specifications:**

Penrite Enviro Plus 10W-50 meet the performance requirements of:
- BMW LL-04
- API SM
- VW 505.01 (2005 update)
- MB 229.31
- ACEA C2/C3
- ACEA A3/B4
- VW 502.00/505.00

- 1 litre bottle
  Part no. 339248

Castrol Engine oil - Magnatec

**Specification:** API SJ/EC, ACEA A3/B4

**Castrol Magnatec** combines Intelligent Molecules with part synthetic technology to instantly protect, from the moment you turn the key. The Intelligent Molecules:
- Clings to your engine forming an extra layer that protects during warm-up and beyond
- Bonds to metal surfaces making engine parts more resistant to wear
- Provide protection for all driving conditions and styles

- 5 litre canister . . . . . . . . . . . . Part no. 472236
Exhaust valve
MGF 1.6 and 1.8 except VVC, MGTF 115, MGTF 120 and MGTF 135
made from 21-4N stainless steel with 24.1 mm diameter
Qty. required: 8 . . . . . . . . . . . . Part no. 360211

Inlet valve
MGF 1.6 and 1.8 except VVC, MGTF 115, MGTF 120 and MGTF 135
made from 21-4N stainless steel with 27.6 mm diameter
Qty. required: 8 . . . . . . . . . . . . Part no. 360205

Valve guide
inlet and exhaust valve
standard size
length: 30.00 mm, inner diameter: 6.00 mm,

- Qty. required: 16
  - Part no. 371398

**Gasket**
- Thermostat housing to cylinder head
  - Part no. 493510

**Oil filler cap**
- All MGF and MGTF
  - Part no. 469054

**Champion Spark plug**
- All MGF and MGTF
  - Qty. required: 4
  - Part no. 339312

**NGK Spark plug**
- All MGF and MGTF
  - Qty. required: 4
  - Part no. 471230

**Rubber seal**
- Hydraulic control unit to camshaft carrier
  - MGF 1.8 VVC and MGTF 160
  - Part no. 493715

**Seal kit**
- Hydraulic control unit
  - MGF 1.8 VVC and MGTF 160
  - Part no. 479391

**Cylinder head bolt**
- All MGF and MGTF

These so-called stretch bolts are specifically designed to give a set length under the right torque. As such they should never be used a second time. The desired bias requires careful installation. The cylinder head bolts in the MGF and MGTF are assembled in several stages with defined torque and 180° turns. We recommend that new cylinder head stretch bolts be used and any work carried out to your engine is done in accordance with a factory workshop manual. Whilst you are doing this job we consider it advisable to replace the water pump and expansion cap to minimise any future problems.

- Qty. required: 10
  - Part no. 356136
Valve grinder

Good performance depends on properly seated valves. Badly seated or burnt valves and worn guides and stems result in hot gas escaping under compression, reducing performance and increasing engine wear. Loss of power and poor starting are some of the symptoms. The oscillating valve lapper produces gas tight seals in seconds and converts a standard rotary drill to oscillating action/grinding motion. The 22/28 mm suction heads fit most valves, an essential tool for multi-valve engines

Part no. 321353

Chemico Valve Grinding Paste

Chemico Valve Grinding Paste No 2 is the famous double-ended tin that has been popular for many years with both auto enthusiasts and repair workshops. Chemico Valve Grinding Paste No 2 provides a handy supply of a coarse grinding paste to cut and fine grinding paste to finish 110 g. tin . . . . . . . . . . . . . . . Part no. 489363

Cooling system test

to recognize CO2 in the cooling system

Combustion gas which enters the cooling system through a leak will accumulate in the air cushion above the radiator water level. If this air is analyzed with the cooling system test, the blue fluid will indicate the presence of CO2 gas by changing the colour to yellow

Part no. 488975

Test fluid

replenishment bottle for test set 488975

The fluid is non-toxic, non-flammable, contains no acid and is not dangerous. 300 ml bottle

Part no. 488976
**Oil seal**
drive shaft to gearbox

- 1.8 to gearbox no. C6BP-9712, 1.8 VVC to gearbox no. C4BP-3759
  - RH: Part no. 323775
  - LH: Part no. 342017

- 1.8 from gearbox no. C6BP-9713, 1.8 VVC from gearbox no. C4BP-3760, all 1.6
  - RH: Part no. 372808
  - LH: Part no. 323783

**Aluminium washer**
for oil drain plug (14 mm) . . . . Part no. 468118
for oil filler plug (20 mm) . . . . Part no. 493511

**Control cable**
selector gear

- **MGF (to VIN...2D600100)**
  - length: 147 cm
  - Part no. 477227

- **MGTF (from VIN...2D600101)**
  - length: 139 cm
  - Part no. 486709

- **all MGF and MGTF**
  - length: 217 cm
  - Part no. 477226

**Retaining clip**
cable

- Qty. required 2
- Part no. 477228

**Castrol Gearbox oil SAE 75W-85**
Fully synthetic oil for modern 4 and 5 speed manual gearboxes which require API GL 3 or 4 oil
- 1 litre bottle . . . . . . . . . . . . Part no. 472132

**Land Rover Gearbox oil MTF94**
- 1 litre bottle . . . . . . . . . . . . Part no. 465788
- 5 litre canister . . . . . . . . . . . Part no. 465787
Clutch kit
all MGF and MGTF
Part no. 339221

Clevis pin
slave cylinder push rod to release arm
Part no. 17018

Brake and clutch fluid DOT4
1/2 litre bottle
Part no. 319650
1 litre bottle
Part no. 319587
5 litre canister
Part no. 319559

Gunson’s Brake bleeding set
‘Eezibleed’. An excellent way to take away the fuss and mess from bleeding hydraulic systems. Fed by air pressure from the spare wheel, it provides 1/4 Lb of pressure to the fluid container
Part no. 21558
Content: 1 x bottle, 1 x bottle cap assembly with tyre connector, 3 x hose set – 3.5 x 303 mm, 5.4 x 303 mm, 5.4 x 183 mm, 1 x 25 mm cap and seal for Lockheed systems, 1 x 27 mm cap and seal for VAG, 1 x 44/45 mm plastic cap and 2 seals for metal Girling and all ATE systems (for 44 mm use thin seal, for 45 mm use thick seal), 1 x 46 mm cap and seal for some Girling systems. Other caps are available should these not fit the vehicle’s reservoir

Clutch master cylinder
all MGF and MGTF
Part no. 488965

Clutch slave cylinder
all MGF and MGTF
Part no. 469282

Clevis pin
slave cylinder push rod to release arm
Part no. 17018

Spring clip
slave cylinder push rod to release arm
Part no. 493517
**COOLING SYSTEM**

**RADIATOR, THERMOSTAT AND WATER PUMP**

**WATER PUMP**
- all MGF and MGTF
- Part no. 337170

**THERMOSTAT**
- pressure relief type - hose mounted
- MGTF from VIN 4D629951
- Part no. 458165

**THERMOSTAT**
- engine mounted
- All MGF, MGTF to VIN 4D629951
- 88° C
- Part no. 361319

**THERMOSTAT HOUSING**
- engine mounted
- All MGF, MGTF to VIN 4D629951
- Part no. 493516

**GASKET**
- thermostat housing to cylinder head
- Part no. 493510

**‘O’ RING**
- thermostat
- All MGF, MGTF to VIN 4D629951
- Part no. 458162

"O" RING
- thermostat housing
- All MGF, MGTF to VIN 4D629951
- Qty. required: 2
- Part no. 453784
**Radiator hose**

*all MGF and MGTF*

- Top .................... Part no. 299094
- Bottom .................. Part no. 299100

**Water pipes**

*engine to radiator - set of 2*

*all MGF and MGTF*

- Made from high quality steel . . . Part no. 339748
- Made from stainless steel . . . . Part no. 493520

**Radiator bleed screw**

*Original plastic variant*

Part no. 493519

Replacement for the original plastic radiator bleed screw.

The plastic screw can break and cause coolant loss with catastrophic results. This new design eliminates the need to remove the screw as it has a bleed nipple machined into the aluminium screw. It also enables coolant to be bled easily using tubing without coolant spilling onto the bodywork. Please note: this item fits to all MGF and MGTF models with standard radiators.

Part no. 493677

**Filler cap**

*expansion tank*

Part no. 458157

**Radiator**

*with high efficiency aluminium cord, new*

*all MGF and MGTF*

Part no. 486803
**Anti-freeze coolant**

**radiator**

**MGF to VIN...YD512771**

Antifreeze coolant is one of the most vital fluids in your car’s operation, since it protects the engine from corrosion, from boiling or freezing temperatures, and helps transfer heat from the engine to the radiator. Based on ethylene glycol with corrosion inhibitors. A concentrated all year round protection anti-freezing liquid type with low freezing point, designed for all engine types including full-aluminium units. Meets the performance requirements of: BS 6580-1992, AFNOR NF R 15-601 and VAG TL 774 C. Colour: blue, consistency: syrupy. Can be mixed with all ethylene glycol based antifreeze coolants

1 litre bottle . . . . . . . . . . . . . Part no. 373200
1,5 litre bottle . . . . . . . . . . . . . Part no. 314878
5 litres can . . . . . . . . . . . . . . Part no. 315178

**Anti-freeze coolant**

**radiator**

**MGF from VIN...YD512772, all MGTF**

High efficiency non-toxic liquid cooling anti-freeze. Based on Ethylene Glycol with special additives to improve temperature characteristic (freezing/boiling). It also possesses advanced anticorrosive properties. The expanded period of operation of a cooling liquid (which is frequently equal to time of “life” of the engine or the car) due to operating on the margins of compatibility will inhibit corrosion.

Meets the performance requirements of:

Colour: purple, consistency: syrupy

1.5 litre bottle. . . . . . . . . . . . . Part no. 493787

**Redline Water Wetter**

Doubles the wetting ability of water. Improves heat transfer. Reduces cylinder head temperature. Reduces rust, corrosion and electrolysis. Cleans and lubricates water pump seals and can be used with all antifreeze/coolants. Improves the ability of coolant to wet heat transfer surfaces by 50%. This provides significantly better coolant contact in the cylinder head and can reduce coolant and head temperature by as much as 65°F. Can be used with 100% water in racing but does not protect magnesium or alter freezing point

355 ml bottle . . . . . . . . . . . . . Part no. 303509
Radiator hose
water pipe to water pump
All MGF and MGTF with manual transmission

K&N Air Filter Performance Kit 57i

57i Series Intake Kits are specifically designed for each different vehicle and will free your car from the size restriction that comes with the factory air box. These economical kits can take a variety of different forms based on vehicle characteristics and available space under the hood. Each kit is designed to provide power throughout the RPM range. Gen 1’s take advantage of the added airflow provided by an oversized air filter replacing the restrictive factory air box. Designed to increase HP and acceleration, engineered to specific vehicle design, easy to install, usually in 90 minutes or less, lasts up to 100,000 miles before service is required (depending on driving conditions), replaces OEM filter and air box. Air filter is washable and reusable, Works with original equipment manufacturer computer systems.

MGF 1.8 (to VIN...2D600100)

Fuel tank, fuel pump and fuel filter

Specially for fuels with Bio-Ethanol (E10)

Wagner additive Bactofin

Modern fuels attack the metal parts of the fuel supply systems. This problem applies especially to older vehicles, while in modern cars, for good reasons, more and more plastic tanks are used. The second problem relates to biofuels and mixed fuels. This problem applies to owners of all ages of cars and modern cars too. In modern fuels bacteria grow in unprecedented quantities. This produces a lot of dirt, especially when the vehicle is not in regular use. The pipes gradually get blocked and the tank becomes contaminated with dirt. Rather than the drastic measures of replacement of all parts of the fuel supply system, regular use of Bactofin will reduce the problem considerably. Using Bactofin is an easy decision for vehicles which normally operate with lead-replacement or top oil. Using Bactofin is as easy as using lead-replacement or top oil and can give owners a clear conscience. Bactofin also prevents any corrosion of the fuel system. Rust has no chance!

Koni shock absorber

The Koni Sport product line is one of our specialties. Koni provides Sporting Drivers with a carefully designed range of sport shock absorbers. This product focuses on exceptional road holding and handling, combined with a reasonable level of driving comfort. They can also be used with spring kits to lower a vehicle by up to 35mm. Many of the Koni Sport dampers are externally adjustable by means of an adjustment knob at the top of the damper. This means you do not have to remove the damper from the vehicle to adjust the rebound forces. This enables you to fine tune the handling & ride to suit your driving style.

**EBC Brake pads**

The material used in ‘green stuff 2000 series’ brake pads is Kevlar based. The brake pads give a strong progressive braking from low temperature up to 900°F; they are great for fast road, road sport and light race cars. Most ‘green stuff’ brake pads are type approved ‘E’ marked and meet the Reg.90 certification, this information will be found on bottom of each package. As an added bonus Kevlar based brake pads produce less brake dust than other materials and have fantastic wear life.

**Goodridge Brake hoses**

Goodridge have developed and manufactured hoses for the following high profile applications Formula 1, Thrust 2 (world land speed record holder), Nascar, every major Rally team. Because of their expertise in the hydraulics field they have been able to apply this knowledge to the automotive industry to give replacement brake hoses and fittings that outperform even the original equipment products. Goodridge kits feature the finest quality stainless steel braided hose, which improves braking performance, eliminates the spongy feel of rubber hoses and provides superior resistance to corrosion. Hose end fittings are zinc plated steel as standard or stainless steel as an option. Goodridge manufacture hose for all the major manufacturers.

Rim band
to fit 16" wheels

There are not many aspects of motoring in which modern safety standards are below those of the twenties, but some vintage and classic cars currently in use are in fact operating in a less secure state than when they were new. A new range of ‘old’ products is designed to bring back better than the original safety standards. One source of potential danger lies in those elegant components, wire wheels. The spokes of a wire wheel have sturdy heads which protrude into the well of the wheel-rim and can, because of heat transmitted from the brakes, become very hot if a car is being driven hard. This means that the well of a wire wheel is always knobbly and often hot. Needless to say, this is not a healthy environment for an inner tube, and wire wheels will not accept tubeless tyres. Wire wheels were originally fitted with rim bands, fabric – or more effectively – rubber strips mounted in the wheel-well to protect the inner tube from the spoke heads. Unfortunately, rim bands have been out of production for many years now, forcing wire wheel users to rely on either old bands or no bands at all – with obvious dangers. We have a range of rim bands, which we are now offering under the ‘Classico’ brand name. Modeled on the original patterns, the bands benefit from modern materials and manufacturing methods to combine the latest technology and quality-control with complete conformity to the original shape and dimensions. “Classico” rim bands are available to fit rims between 13 and 16 inches in diameter and are sold individually
Qty. required: 4 . . . . . . . . . . . . Part no. 328329

Tyre valve caps
chromed with ‘MG’ logo in black

Hammer
for shrinking
With 310 mm long hickory handle and 225g steel
head with 38 mm diameter
Part no. 216524

Dent Puller
suction cup with 118 mm diameter
Can be used for body work or for carrying glass
and more
Part no. 21503

Body Contour Gauge
with stainless steel pins for quick and precise
gauging of profiles. Comes with integrated metric
and imperial rule. Max depth: 50 mm, max
length: 150 mm
Part no. 13098

Panel beater sand bag
for the manual forming of sheet metal
Made of genuine heavy duty leather, diameter:
33 cm, to be filled with sand
Part no. 394574

Advance board
240 x 270 mm, 360° rotatable
Contains: supporting base and tear-off blocks with 2 x 50 working
surfaces. Ergonomic design. Turnable 360° and firm grip. Easy handling
for reduced fatigue. The work-pad can be held, put down
and used again easily with one hand. Perfect for all
2-components putties. For more then
100 mixtures
Part no. 14926

Sealing compound
for auto body work
This 1- compound sealant can be
painted, stays hard-elastic and can be used
from -35° up to + 70° C. Very durable and very
good adhesion
310 ml

Windscreen

all MGF and MGTF
green tinted with finisher assembly
Part no. 323764

Polishing kit
for windshield glass repair. Removes scratches and is the ideal tool to save that old hard to get windshield
Part no. 372226

Tool
for the removal of bonded screens
Part no. 241742
A1® HOOD CLEANER

for all kind of hoods. A1 Soft Top Cleaner works very intensively, and yet is protective of the roof at the same time. It picks up the dirt and binds it in the foam. It can work in over a long time, since it does not run off slanting sides. A1 Soft Top Cleaner can be applied precisely on spots that most need it, so it is very economical (8–12 applications with full foaming, compared to 2–6 applications with conventional agents). Refreshes the colours while cleaning. 400 ml aerosol
Part no. 492764

RUBBER MATS

footwell

all MGF and MGTF
ash grey with ‘MG’ logo.
Supplied in pairs
Part no. 322320

FOOTWELL CARPETs

all MGF and MGTF
black with embroidered ‘MG’ logo. Supplied in pairs
suitable for LHD vehicles. . . . . Part no. 322321
suitable for RHD vehicles. . . . . Part no. 320331

CANVAS HOOD

stayfast material

A modern hooding fabric that is essentially a lighter weight version of our Mohair fabric. Stayfast offers all the benefits of a traditional Double Duck hood but with superior colourfastness and a much longer life expectancy. Stayfast does not require any special treatments and will give many years of service. Stayfast is ideal for use as an upgrade to a vinyl hood and is ideal for most sports cars such as the MGF, MGTF and other similar sized sports cars. Stayfast is available in black only
black, with zip window

MGF to VIN...WD024604
Part no. 493696

MGF from VIN...WD024605, all MGTF

**Goodridge Brake hoses**

Goodridge have developed and manufactured hoses for the following high profile applications: Formula 1, Thrust 2 (world land speed record holder), Nascar, every major Rally team. Because of their expertise in the hydraulics field they have been able to apply this knowledge to the automotive industry to give replacement brake hoses and fittings that outperform even the original equipment products. Goodridge kits feature the finest quality stainless steel braided hose, which improves braking performance, eliminates the spongy feel of rubber hoses and provides superior resistance to corrosion. Hose end fittings are zinc plated steel as standard or stainless steel as an option. Goodridge manufacture hose for all the major manufacturers.

stainless steel braided, set with 4 lines

**MGF to VIN...2D600100**  
Part no. 349328

**MGTF from VIN...2D600101**  
Part no. 493595

---

**EBC Brake discs**

The latest in sport discs that feature wide aperture slots to draw cool air into the braking contact area and reduce temperatures preventing brake fade. Dimple drilling avoids stress cracks and the new gold anodized finish provides great looks whilst preventing corrosion. Another great feature of these dimpled and slotted EBC 3GD Turbo discs is the way they maintain flat and parallel pad wear and avoid the record grooves or galling common with non-slotted brake discs. This improves pad contact and braking throughout the life of the disc and pad set.

3GD Turbo series with curved grooves and spot drillings to maximize pad performance - supplied in pairs for standard 2 pot calipers  
front - vented

Part no. 493575

---

**EBC Brake pads**

The material used in 'green stuff 2000 series' brake pads is Kevlar based. The brake pads give a strong progressive braking from low temperature up to 900°F, they are great for fast road, road sport and light race cars. Most 'green stuff' brake pads are type approved, 'E' marked and meet the Reg-90 certification, this information will be found on bottom of each package. As an added bonus Kevlar based brake pads produce less brake dust than other materials and have fantastic wear life.

**EBC Brake pads**  
front, Kevlar 'green stuff' specification

Part no. 471516
**Car cover**

Our Car covers are made from high quality materials to ensure that your quality expectations will always be met and surpassed. We use the latest generation materials, double stitching, durable securing straps and purpose made fittings. We have a wide range of cover materials available. There is one blue indoor cover available and one heavy duty grey outdoor cover. The breathable indoor dust cover is manufactured from a thick non-woven material in a royal blue colour. It is breathable and 100% UV resistant to protect paintwork and prevent colour fade and comes with elasticated hems and underbody straps for a snug fit. This type of car cover will not deposit fluff on mohair or canvas hooding material and is both machine and hand washable. The heavy duty outdoor cover comes with a soft lining to protect paintwork. It is a substantial cover weighing about 3 kg and packed in a sturdy zipped storage bag with handles. The grey coloured outer skin is soft and pliable, yet totally waterproof, and the stitched seams are heat sealed. Of course you can order your free colour sample: 491710 (blue) and 355026 (grey)

In the wake of the demise of the MG Midget and MGB, there seemed little prospect for the MG badge beyond being used as a kind of ‘GT’ badge for various Austins and Rovers. However, thanks to the determination of a few people and an enduring affection in public hearts the tale has had a happier ending. This is the story of that journey from desolation to rebirth, just like the phoenix from which the project that created the MGF took its name. With a deeply researched text, detailed specifications and other data, and over 300 illustrations, mostly in full colour, this book by renowned motoring author and MG expert David Knowles will be a vital addition to the bookshelf of anyone with an interest in modern British sports cars.

MGF and TF

In the wake of the demise of the MG Midget and MGB, there seemed little prospect for the MG badge beyond being used as a kind of ‘GT’ badge for various Austins and Rovers. However, thanks to the determination of a few people and an enduring affection in public hearts the tale has had a happier ending. This is the story of that journey from desolation to rebirth, just like the phoenix from which the project that created the MGF took its name. With a deeply researched text, detailed specifications and other data, and over 300 illustrations, mostly in full colour, this book by renowned motoring author and MG expert David Knowles will be a vital addition to the bookshelf of anyone with an interest in modern British sports cars.

MG by McComb

MG by McComb has happily remained in print because it is the standard work on the make. Not only is this book the definitive work because Wilson McComb was on the inside at MG for a decade, it is doubly so because the author knew exactly how a complex story such as this should be researched and told. And in Jonathan Wood, Osprey are proud to have employed the talents of a comparable expert. F. Wilson McComb updated the book in 1984, but sadly died before he could see the spectacular rebirth of his beloved marque, with the MG RV8 of 1992 and three years later, the mid-engined MGF roadster. From Cecil Kimber and the Bullnose MGs of the 1920s, to the thirties Midgets, the Magnettes, the TCs, the MGA, MGB, even the Metro and Maestro, every twist in the tale was followed by Wilson McComb, with an intimate knowledge not only of machinery but also of men, those who created the marque, some who abused it. There are not many more interesting automotive stories than that of the Octagon to be told, and MG will be one of the few British marques to make it into the 21st century

written by F. Wilson McComb, 376 pages, 180 coloured and b/w pictures, 245 x 190 mm, Hardcover

**Socket set**

Metric and AF

Draper Expert Hi-Torq™ sockets have 6 or 12 corners with a special radius design giving added torque. With this design Draper extends the life of the socket and fastener. These sockets have a hole for positive ball retention in accordance with DIN 3120 specification. Expert quality socket set manufactured from chrome vanadium steel hardened, tempered, chrome plated and polished for corrosion protection. Packed in blow mould carrying case and display.

41 piece. 1/2" square drive . . . . . Part no. 311692
42 piece. 3/8" square drive . . . . . Part no. 306849
75 piece. 1/4" square drive . . . . . Part no. 214942

**Gear wrench set**

Gear wrench open end with 15° offset, ratchet end with 180° flexible head and 5° ratchet mechanism. Chrome vanadium steel, hardened, chrome plated, polished

7 piece set with 10, 12, 13, 14, 15, 17 and 19 mm wrenches
Part no. 24487

10 piece set with 8, 10, 12, 13, 14, 15, 17 and 19 mm wrenches. As a special feature the wrenches can be converted to a 1/4" and 3/8" drive
Part no. 244338

**Combination spanner set**

Made from forged from chrome vanadium steel. Comes with tool bag

11 piece set with 6, 7, 8, 9, 10, 11, 12, 13, 14, 17 and 19 mm wrenches
Part no. 218960

14 piece set with 8, 9, 10, 11, 12, 13, 14, 17, 19, 22, 24, 27, 30 and 32 mm wrenches
Part no. 319635

**Combination spanner set**

Heavy duty edition, 1.5 times thicker as standard spanners to transport maximum torque!

14 pieces multi colour set with 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18 and 19 mm wrenches.
Comes with tool roll
Part no. 464592
**Pocket wrench**

Metric, 18 times adjustable from 8 to 25 mm

Spring loaded adjustment, works like a pocket knife and allows the correct size to be used every time. Small enough to fit into your pocket, and packed in a sturdy material pouch. Special spacer blades lift into place for a snug fit that eliminates the play of most adjustable wrenches. 12 SAE sizes range from 5/16 to 1”; 18 metric sizes range from 8 to 25 mm. Folds down to an incredible 5 x 2 x 3/4”, ideal for: cars, boats, caravans, motorcycles, trucks and kitchen drawers.

Part no. 467863

---

**Torque wrench**

With 1/2” square drive, adjustable from 28 to 210 Nm, length: 465 mm, supplied with plastic box.

Torque wrench with reversible ratchet head. The lb-ft and Nm scale is engraved on the barrel of the wrench. The micrometer type sleeve allows accurate preset torque values to be set. When torque is reached the wrench produces an audible click and a release of tension.

Part no. 311625

**Valve Devil**

**Valve grinder**

Good performance depends on properly seated valves. Badly seated or burnt valves and worn guides and stems result in hot gas escaping under compression reducing performance and increasing engine wear. Loss of power and poor starting are some of the symptoms. The Gunson EEzi-Lap oscillating valve lapper produces gas tight seals in seconds and converts a standard rotary drill to oscillating action/grinding motion. The 22/28 mm suction heads fit most valves, an essential tool for multi-valve engines.

Oscillating valve lapper produces gas tight seals in seconds and converts a standard rotary drill to oscillating action/grinding motion. The 22/28 mm suction heads fit most valves, an essential tool for multi-valve engines.

Part no. 321353
Nut splitter
 supplied in a 3 piece set.
From 9 to 22 mm and from 3/8 to 7/8”
Part no. 317014

Nut splitter singly
with chromed surface
Expert quality, manufactured from chrome vanadium steel with square drive ends.
9 to 12 mm, length 80 mm . . . Part no. 328862
12 to 16 mm, length 105 mm . . . Part no. 328863
16 to 22 mm, length 130 mm . . . Part no. 328864

Hand tap
 supplied in a 10 piece metric set. Manufactured from special high carbon steel with accurately cut threads. Contents tabs from 3 to 12 mm
Part no. 287485

Magnet holder
 flexible. Length: 540 mm. The best one we could find! Capable of lifting over 3 pounds
Part no. 371962

Grease gun
new system for 500 g cartridges, easy, mess free cartridge change, easy to gauge amount of grease remaining
Part no. 220563

Grease
LZR 2 longlife grease is a new grease for roller and friction bearings, that is made from high quality basic oils by using lithium soaps as thickening agents. It shows an extraordinary oxidation resistance. LZR 2 grease is water resistant, adhesive, can be loaded with pressure and is protective against corrosion. These properties, in connection with high work resistance, very good abrasion rating and particularly strong adhesive quality, characterise this lubricant as particularly appropriate for lubrication under difficult operating conditions and at highly loaded roller and friction bearings. Practical advantages: LZR 2 can be used universally as a long-term grease. It is recommended for lubrication of vehicles, industrial machinery and for all machines and devices in the field of construction, stone and earth.
Temperature range: -30° to +120°C
Part no. 305693

Impact wrench
 with 1/2” drive. Contents: ten impact nuts from 9 to 27 mm, one 5” extension bar, one mini oiler, one nipple. Tech. data: 6.3 bar operating pressure, 310 Nm maximal torque, 7,000 rpm free speed
Part no. 488134

Camshaft locking tool
for repair and adjustment
Part no. 493431

Tool
for locking the flywheel on Rover K Series engines
with PG1 manual gearbox . . . Part no. 493695
with ZF stepspeed gearbox . . . Part no. 493694

Socket
46 mm for 1” drive - for the removal of ball joints
Part no. 493698

Adaptor
for socket 493698
reduces 1” to 3/4” drive
Part no. 493700
HYDROLASTIC PUMP
for cars with hydrolastic or hydogas suspension
with vacuum, Rover approved
Part no. 493522
without vacuum
Part no. 493521

THERMOMETER
digital infrared thermometer with built-in laserpointer for exact measurement.
Temperature range from -20 to +520 °C (-4 to 968 °F).
Accuracy: +/-2°C or 2% of the reading. Response time: 500 mSec. Resolution: 0.2°.
Now with an easy-to-use pistol design and illuminated display.
Suitable for a lot of tasks around the car and workshop. Check the temperature of the engine, manifold, tyres and brakes. Which cylinder is getting hot? A fast detection of faulty components can save time and prevent expensive repairs and severe damage. A 9 volt battery is included
Part no. 306497

BATTERY
for thermometer 306497 . . . . . . Part no. 471684

MULTIMETER
digital multimeter with a rotary switch for selection of the 24 different functions and ranges.
Suitable for the measurement of DC volts and amps, resistance, dwell, rpm on 4, 6, 8 and 12-cylinder engines. The testing of diodes is also supported. The shock resistant housing is made of rubber. Supplied with 2 sets of cables: one pair with crocodile clamps and one pair with probes. A 9 V block battery and vinyl storage bag is included
digitally, shows: dwell, rpm, voltage, resistance, amps
Part no. 314833

TACHOMETER
digital gauge with laser RPM pick up. With 5 digit LCD-display and a measuring range from 2.5 up to 99,999 RPM,
Accuracy: +/- 0.05%+1 RPM. The built in memory saves min. and max. RPM and the last measured value. With this special meter all rotating parts can be checked. Great diagnostic tool for gearbox, final drive and many other applications
Part no. 221361

DOLLY
680 kg capacity. Fast and convenient lifting and moving of your vehicle. Dimensions: 880x620x230 mm. Max. weight per trolley: 680 kg. Max vehicle weight: 2720 kg. Even suitable for wide wheel up to 225 mm/ 9". The car can be rotated 360°. Solid hard rubber wheels with ball bearings. Built in hydraulic provides an easy lifting
Qty. required: 4 . . . . . . . Part no. 338358

STAND WITH WHEELS
for 4 vehicle positioning jacks (part no. 338358) without positioning jacks
Part no. 489459

DOLLY
for an easy car moving, max. load 500 kg.
Dimensions: 390 mm wide, 590 mm long. Also suitable for wide wheels
Qty. required: 4 . . . . . . . . . Part no. 338357
